Common Core 3.0 Curriculum Development Plan

Content Development

The plan for the common core revision includes development of:

a. 20 online modules
b. 24 classroom based curricula
c. 20 field activities
d. Field advisor / coach curriculum

The training we develop will consist of:

a. 26.5 hours of online content
b. 18.5 days of classroom content

Although these modules will incorporate content from existing sources, there will be a need to develop new content.

Phased Development Plan

New information about resources available for content development requires revision to our original timeline to allow for a longer development period. RTA Directors have agreed to take a phased approach to the curriculum development, starting with development of one practice block. CalSWEC will develop the materials identified in the Assessment block, updating the Child and Youth Development, Assessment, and CMI curricula, including developing the online modules, classroom modules, field guide, and evaluation materials. Following curriculum development, the materials will be reviewed and vetted by the CC3.0 Revision Team and then piloted with a core cohort in place of the current Child and Youth Development, Assessment, and CMI curricula. The Assessment block of content will then be finalized, and implemented as part of Core statewide. Concurrently, but over a longer period of time, additional curriculum development will be ongoing for the other blocks. Using this timeline, phase 1 will be completed in FY 13/14 and FY 14/15. Phase 2 will begin in FY 13/14 and continue through FY 15/16 and FY 16/17.
The table below identifies the revised timeline for the first phase of curriculum development and piloting and operationalizes the tasks to be completed:

<table>
<thead>
<tr>
<th>Timeframe</th>
<th>Goal</th>
<th>Tasks</th>
