WORKSHOP ANNOUNCEMENT

Facilitating a Child and Family Team to Support Pathways to Mental Health

Course Description

Child and Family Teams are an integral way that child welfare services and mental health services will work together to support children, youth, and families. Child and Family Teams are more than meetings and need regular care and maintenance in order to be successful. Facilitators must be able to create strong yet open and evolving teams to meet the needs of children, youth and family over time. Participants will:

- Strengthen engagement skills for teams
- Develop a safe team environment
- Guide, brainstorm and create consensus with the team
- Integration of multiple plans
- Assist the team in developing, evaluating progress and revising the plan

Through practice, participants will be prepared to facilitate a successful Child and Family Team.

Core Practice Model Guide

The CPM Guide has specific values, principles, practice components, standards, and activities. It is intended to facilitate a common strategic and practical framework for integrated services planning, delivery, coordination and management among all those involved in working with foster care children with mental health needs.

Please review the guide prior to attending this training. The guide can be found at this link:

Medi-Cal Manual for ICC, IHBS, and TFC for Katie A. Subclass Members

This manual provides information for developing mental health plans and for Medi-Cal providers concerning the provision of three covered specialty mental health services for those child/youth who are member of the Katie A. subclass. It provides the standards and guidelines for the delivery and billing of ICC and IHBS. (TFC will be added to this manual at a later date).
